WORK EXPERIENCE

TapHere! Technology | Director of Innovation   2022 - PRESENT

- Architected and implemented bespoke large-scale solutions for clients to achieve High Availability and Business Continuity
- Served as SME and lead technical consultant to ensure stickiness and Customer Success
- Fostered community and increased engagement through thought leadership in DevSecOps, Management, and Software QA
- Created partner relationships and introduced cutting edge technology to expand company-wide knowledge
- Acted as an individual contributor on multiple projects, closing out critical tickets and enabling essential features to ensure team success

TapHere! Technology | Software Engineer   2019-2022

- Collaborated with customers to identify needs and prioritize delivering features based on business value
- Architected and implemented a Chef-based infrastructure and DevSecOps automated solution in an air-gapped environment
- Consulted US Government agencies on automating compliance with CIS Benchmarks using Chef Infra and Chef InSpec
- Automated infrastructure creation for multiple environments (dev, test, stage, and prod) in AWS and Azure using HashiCorp Terraform
- Set up CI/CD pipeline to deliver projects from lower to higher environments using Chef Habitat to package, configure, and deploy applications
- Directly interfaced with and provided excellent technical support for clients across multiple projects
- Redesigned and maintained an application with a Vue front-end and a Ruby on Rails back-end with a focus on intuitive user experience
- Implemented testing suite for a Vue application and integrated continuous testing into pipeline using CodeShip

Axios (CACI) | Software Engineering Intern   Summer 2017 & 2018

- Assessed and adapted to customer specifications iteratively for multi-million dollar contract bid
- Developed a React App front and back-end within a team environment
- Debugged and contributed to legacy code; wrote and published new supporting documentation for legacy tool in an interactive tutorial-based website
- Learned and understood importance and responsibilities of the intelligence community
